The Earth Clean and Healthy.**

**Color everything
but the litter!**

KEEP STORM DRAINS CLEAR

What Is Stormwater?

Stormwater is rain or melted snow that runs over the ground, roads, and roofs.

Where Does It Go?

Stormwater goes into ditches and storm drains. Storm drains are the openings along the street that collect water and send it to rivers, lakes, and the ocean.

Why Is This Bad?

Stormwater can pick up yucky stuff like dirt, leaves, trash, dog poop, and chemicals. This can hurt fish, birds, and other animals that live in the water.

**Pet poop pollutes
our water. Scoop
the poop!**

**How Many Dogs Can
You Count?**

WATER YOU WAITING FOR? **TAP IN!**

Tap Water Saves The Day!

Tap water comes from your sink. Helpers in our community test the tap water to make sure it is clean and safe to drink!

Why Skip Bottled Water?

Bottled water costs more and makes a lot of trash. Use a reusable bottle instead. Fill it up with tap water again and again!

BE A WATER CHAMPION!

- ✓ *Turn off the tap when brushing your teeth*
- ✓ *Take short showers*
- ✓ *Tell a grown-up if you see a leak*

**HELP HYDRO JOE
GET TO THE CUP!**

BE A WASTE WARRIOR!

Fight Waste Before It Begins

You can help the Earth by making less trash and by recycling. Some things, like plastic straws, last a very long time and can't be recycled. Recycling turns old things into new things, like magic!

What Can Your Family Do?

- ✓ *Say NO to plastic straws and forks*
- ✓ *Bring reusable shopping bags wherever you go*
- ✓ *Pack lunch in reusable containers*
- ✓ *Check askHRgreen.org with a grown-up to learn what is recyclable where you live*

Recycling 101

A lot of our paper, cardboard, plastic bottles, and metal cans can be made into new things. If you are not sure what to recycle, ask a grown-up. Or put it in the trash until you know.

Circle the items that can be recycled in your community and place an X on those that are trash. For even more fun, scan the QR code to play our waste sorting game!

RECYCLE: empty cereal box, cleaned out can of tuna, empty plastic bottle, rinsed out milk jug, empty soda can, toilet paper roll

TRASH: fish bones, burger & greasy packaging, pizza scrap

BE A PIPE PROTECTOR

FOG = Fats, Oil & Grease

FOG and food should never go down your sink. It can cause your sink to stop working! Always put FOG and food you do not want in the trash can.

Milk

Peanut Butter

Greasy Pan

Butter

Match The Drain Clogging Items to the Correct Labels

Toilet Tips

Toilets are not trash cans!

Only flush the 3 P's

POO

PEE

(TOILET)

PAPER

Flush OR Trash?

Circle what can be flushed.
X out what should go in the trash.

FLUSH: Poo, pee, toilet paper
TRASH: Ducky, wipes, cotton swabs

YOU'RE A GREEN TEAM HERO!

- ✓ Only rain goes in the storm drain
- ✓ Pick up dog poop
- ✓ Drink tap water
- ✓ Recycle the right way
- ✓ Say "no thanks" to plastic
- ✓ Only flush the 3 P's, no wipes!

*I learned how to make smart choices
for a cleaner world.*

*I pledge to do my part at home, at
school, and everywhere I go.*

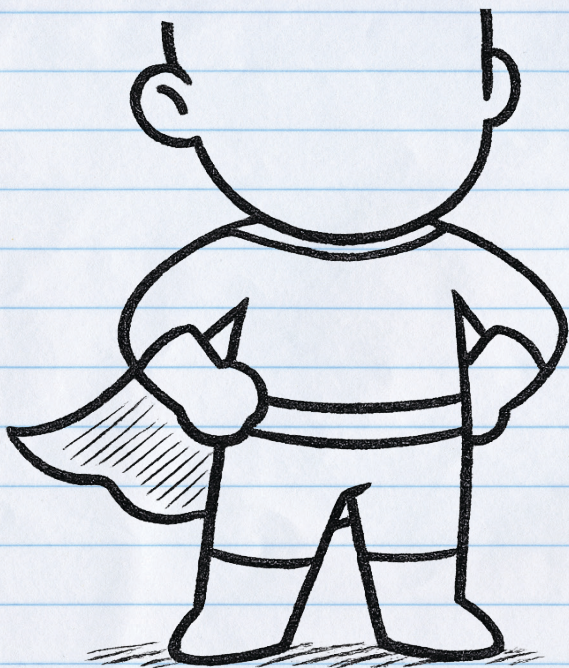

Write your name to make it official!
